# CASSETTE 100/120 LINK BRACKET

Achieve a finished look for your roller shade by adding a sleek, gently curved cassette that is available in a range of sizes. The Cassette 100 & 120 systems are designed to work with our popular medium sized roller systems, featuring a thin lightweight extrusion which is low in cost and easy to install. With the link bracket one cassette extrusion can hold two different shades and the shades can be operated by one control, which means smaller costs per shade and simultaneous operation of two shades.

*It is recommended to install a mounting bracket adjacent the link bracket position.

SYSTEM INDEX

1	BRACKET FOR CASSETTE 100/120 - 38MM	CRUSLB660
2	CHAIN CONTROL	Refer to system Product Specifications Manual
